

Advanced PVC Decking

The Most Realistic Wood Looks & Best Performance

With highly advanced materials science, our Advanced PVC decking delivers the most realistic wood looks and best performance to anything on the market. Our PVC decking is the greenest PVC Decking on the market as it's made with a majority of recycled content, including hard-to-recycle, post-industrial plastic waste like vinyl trim and siding. And what's more, it's fully recyclable at the end of its useful life, for a truly sustainable option.

- Most advanced polymer material in the cap and core for superior performance
- Highly resistant to moisture damage like mold and mildew and won't rot, crack, splinter, or warp
- Protected by an industry-leading Lifetime Limited Product Warranty
- Superior resistance to fading, staining, and weathering — backed by a 50-Year Fade & Stain Warranty
- Extremely low maintenance: No sanding, sealing, or staining — ever
- Barefoot-friendly: Stays up to 30° degrees cooler* and offers 40% better slip resistance than competitive composites
- Better for fire zones: WUI-Compliant and Class A Flame Spread Index rated options available
- Made from approximately 50% recycled material, including post-industrial scrap like vinyl trim and siding. Recyclable at end of life. Significantly more sustainable than premium hardwood (i.e., Brazilian Ipe, Cedar, etc.). No trees are felled for this product.

*Although TimberTech Advanced PVC Decking is cooler to the touch than many other deck board products, all decking products will get hot in the sun. Additionally, the darker the decking color, the hotter it will feel. For hotter climates, consider choosing a lighter color.

VINTAGE COLLECTION® *Exotic Hardwood Aesthetic*

Engineered to resemble sought-after premium hardwoods like Ipe, Mahogany, and Teak, the Vintage Collection delivers high-end aesthetics. The collection features a refined wire-brushed finish and multi-tonal color blending with highlights and lowlights to replicate the nuanced colors of these prized hardwoods.

- Multi-Width Decking available in all colors.
- MAX (1.5" thick) boards available in Coastline. Can span up to 24" on center, making it ideal for boardwalks, docks, and other commercial applications.
- Best choice for fire zones thanks to WUI-compliance and Class A Flame Spread Index rating.

LANDMARK COLLECTION™ *Crosscut Hardwoods*

The Landmark Collections is designed to resemble popular hardwoods like white oak and walnut that have been crosscut for character-rich texture. The crosscut cathedral grain with a matte finish delivers a soft yet textured look while the cascading color blending ensures a unique look for every board.

- All colors available in standard width and thickness.
- Better choice for fire zones thanks to Class A Flame Spread Index rating.

HARVEST COLLECTION® *Cathedral Grain*

The Harvest Collection features an attractive cathedral grain with varying peaks and swirls for an authentic wood look. The soft, solid colors deliver a painted or stained wood aesthetic and are highly versatile, suiting a wide range of styles.

- All colors available in standard width and thickness
- Brownstone and Slate Gray available in standard and wide widths.
- MAX (1.5" thick) boards available in Slate Gray. Can span up to 24" on center, making it ideal for boardwalks, docks, and other commercial applications.
- Better choice for fire zones thanks to WUI-compliance.
